

ARPC Saddle Butte Press August 2022 Newsletter

[Check Out Our Calendar of Events](#)

Pro Shop/Office

The office and Pro Shop are open 10 to 5 Monday thru Saturday. All popular reloading components are very hard to obtain so expect shortages and we have daily limits when we do have them in stock.

LEAD MINING ON THE RANGE IN AUGUST

We have hired MT2 to mine the lead off our ranges and bays. They are currently scheduled for the first two weeks in August and will start on the Main Range. Expect closures during this period and please check the website for daily updates. We are sorry for the inconvenience but this project is part of our Environmental Stewardship Program and conforms with Best Practices for Ranges with the EPA.

Fall Gun Show

As of today, our Fall Gun Show is on for September 24th and 25th, 2022. We will request volunteers for the show starting the first of September. It will be done by email, and we will send the email address out in our September Newsletter. If you are interested in being a Vendor, please go to our website and click on “gun show” under “info”. Print the application, fill it out and mail it to:

ARPC
29999 Saddle Butte Rd
Shedd Or 97377

We will fill open tables based on postmark date.

Updated Range Rules

Our Range Rules were recently updated. As always, please refer to our website and the posted rules around the range for detailed rules. Here are some highlights:

1. Golf balls are added to the list of targets NOT allowed on the Range.
 2. You are not required to wear your Badge when practicing dynamic shooting (running and gunning) on Bays 1-12. You are still required to have it in plain sight for identification by RSOs and other staff. Guests are always required to wear their guest stickers on their person. This rule was modified due to safety concerns of a lanyard getting hung up on a firearm or otherwise causing an unsafe condition. Please continue to wear your Badge when not involved in dynamic practice. This rule does not pertain to the rest of the range.
 3. Speaking of dynamic shooting we added an explanation on how to do so in a safe manner (please refer to specific rules section of the Range Rules - North and East Bays #3).
 4. We made the temporary rules on Bays 7 & 8 permanent regarding ground targets and steel. This was caused because these two Bays are not aligned with the Butte. Ricochets and bullet splatter can adversely affect other bays because of this alignment. We lowered the risk by increasing the berm height, but it did not resolve the issue. If the bullets all strike the retention berms the risk drops considerably.
 5. There are some other modifications as well and again we urge you to read the complete set of rules on the website.
-

Letter from our Chief Instructor

What Did You Say?

The gun range can be categorized as a great place to find older people, mostly men, who are hard of hearing! After years of shooting, often with unprotected hearing, at a decibel level that can cause both short and long term hearing impairment, you will find one of the things that could have helped prevent such damage, in limited use: firearm suppressors.

If suppressors were cheap and the process of ownership easy, I suspect every gun owner would have one for each gun. However, since 1934 the U.S. government has restricted suppressors, and so there are a few hoops through which you must dive to own one: basically, those hoops are a detailed background check and fingerprinting, paperwork, a check for \$200 and a 9-month wait for the ATF to approve it. Given how much of your time you'll be investing, you'll want to be sure of what suppressor you want before you get started. Here are five points to consider.

For what primary use will you use a “can” (another common reference to a suppressor)?

Do you want to use it on multiple guns?

How will you be mounting the suppressor (threaded vs quick mount)?

How much do you want it to weigh vs how much do you want to spend?

What is, and how complicated is, the process?

The automobile muffler is the prototype of how a firearm suppressor works. A series of baffles help slow down the speed and heat of the discharged gasses. In the movies and TV, these barrel attachments are often referred to as silencers. No one should criticize you for using that term, but it gives the false idea that, with it attached, the firing of a gun remains silent. Only in Hollywood! What it does accomplish is to reduce the decibel level created by the conversion of chemical energy to kinetic energy, by anywhere from 20 db to 35 db; similar to a good set of ear plugs or muffs. A suppressor is rarely, if ever used in crime, and their status is not deserved. In fact, in many European countries, a gentleman (or woman) is expected to use a “muffler” when

hunting, out of respect to others. Any reasonable person would surmise that exempting them from their current classification is well advised.

There is much more to learn concerning suppressors. If there is sufficient interest, I will teach a class on their use and how to select and buy one. Part of the class will involve actual live fire using my suppressors, which include: .22 cal (both screw on and integral), 9mm, 45 cal, and a 30 cal. If you have already bought one and want to learn more, please bring it.

So, please let the ARPC office know if you are interested in this class. It will likely be no more than a 3 hour class, and probably on a weekday evening. The cost and time can best be determined after we assess the interest. You do not need to be an ARPC member to come to this class, though you will save some cost on the fee if you are a current member.

Jim Gallant
Chief Instructor, ARPC

ARPC Classes in August

Safety & Skills Evaluation: August 4, 2022

Basic Handgun: August 7, 2022

Skills Clinic: August 11, 2022

Concealed Carry: August 13, 2022

Indoor Range Safety: August 16, 2022

Cleaning Cleaning: August 16, 2022

AR Level 1: August 20, 2022

Handgun Level 1: August 27, 2022

Private Instruction: Times to be determined on an individual basis

September preview-

AR Fundamentals

AR Level 2

Trauma First Aid

Please check out our calendar for more information regarding our classes.

To register for a class please email classes@arpc.info

Basic Handgun

Our Basic Handgun class at ARPC focuses on handgun familiarity and safety. There are no prerequisites for this class. The intent is to provide basic training for those with little or no shooting experience and for those who want a refresher on the basics. We have had experienced shooters with no formal training benefit from taking this class. Basic Handgun is 5 hours and participants will need a semi-auto handgun, and 50 rounds of new ammo (.380 to .45)

Safety & Basic Skills Evaluation

This is a Skills Evaluation Test to demonstrate that you possess the necessary skill level to bypass our basic classes and advance into Level 1 Handgun or AR Level 1 **THIS IS NOT AN INSTRUCTIONAL OR A TEACHING CLASS!!**

Concealed Carry

In this class you will receive the training qualifying you to apply for both the Oregon Concealed Handgun License and the Utah Concealed Firearm Permit. We teach both because the Oregon permit is limited to Oregon only, so travel out of state is problematic. The Utah concealed permit covers 32+ states. What makes this course unique is that we also provide the photo, the two sets of fingerprints, the application, and an addressed and stamped envelope for the Utah license, so after class you can just drop it in the mailbox. ARPC is a non-profit organization and provides this service to the community by helping to subsidize the cost of this class.

Skills Clinic

The purpose of ARPC Classes is to ensure that you get the training you need to use your firearm safely and proficiently. With this in mind, we are now offering a free clinic that allows you to get additional training on one skill that was covered in the ARPC classes that you passed. One Clinic per class please.

AR Fundamentals

Our AR Fundamentals class at focuses on the modern sporting rifle (MSR) familiarity and safety. There are no prerequisites for this class, as the intent is to provide basic training for those with little or no shooting experience, and for those who want a refresher on the basics. You may bring any modern sporting rifle (MSR), which includes AR-15 style firearms and AK's, but please be aware that advanced classes will be AR-15 (.223 or 5.56) only. AR Fundamentals is a 6 hour class and participants will need a MRS, 60 rounds of new ammo, 2 mags holding 10 or more rounds.

Trauma First Aid

This is a First Aid Class that will cover common injuries but includes more on the type of injuries you might see while participating in shooting sports. This is a hands-on class and may use a pig's shoulder as a teaching aid. As an added bonus, you will receive a CPR, AED, and Basic First Aid Certificate Card at no extra charge.

Cleaning Class

Shooting is fun, cleaning generally is not! But it is a necessary part of firearms knowledge and safety. This class is intended for any firearm owner to better learn how to clean their specific gun, whether it be a handgun, rifle, or shotgun. There is no one correct way to clean, as individual preferences abound. The purpose of this class is to expose the student to different methods of cleaning, from the use of solvents, lubricants, gun oils, CLP, ultrasonic cleaners, air compressors, and don't forget your old toothbrush! Bring your gun(s) and learn from experienced instructors. Bring whatever supplies you ordinarily use. If you have never cleaned a gun before or have no supplies, no worry, this class will help you decide what you do need to clean your gun. We will have supplies to borrow and use for students without their own.

Level 1 Classes

AR Level 1

This class is the next level above our AR Fundamentals class and will build on the skills and knowledge covered in that class. The prerequisite is either ARPC's AR Fundamentals or our Safety & Basic Skill Evaluation. AR Level 1 will be 6 hours and participants will need to bring an AR-15 (.223 or 5.56), 100 rounds of new ammo, and at least 2 Mags holding 10 or more rounds.

Handgun Level 1

This is the next level above our Basic Handgun class and will build on the skills and knowledge covered in that class. The prerequisite is either Basic Handgun Class or our Safety & Basic Skill Evaluation. Level 1 Handgun will be 6 hours and participants will need to bring a semi-auto handgun (.380 to .45), 100 rounds of new ammo, and an outside the waist holster.

Newsletter Classifieds Policy

All Sale/Wanted Items are on a monthly basis. If you wish to place an ad or have your ad continue to run , you will have to inform us either by email (frontoffice@arpc.info) or in-person no later than the 25th of each month. **NO PICTURES.**
